Profile

Entry-level AI and Data Science professional with strong hands-on experience in Python, Machine Learning, Deep Learning, and Data Analysis. Skilled in data preprocessing, exploratory data analysis (EDA), feature engineering, and model evaluation. Experienced in supervised and unsupervised learning, CNN-based computer vision, NLP techniques, and building Retrieval-Augmented Generation (RAG) systems. Eager to apply data-driven solutions and continuously learn new technologies while delivering efficient solutions in a technical environment.

Technical Skills

- **Programming:** Python
- **Machine Learning:** Supervised & Unsupervised Learning, Regression, Classification, Ensemble Learning
- **Deep Learning:** ANN, CNN, Transfer Learning, RNN, NLP
- **Generative AI:** RAG, LLM, Prompt Engineering, Generative AI
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV, Sentence Transformers, FAISS, LangChain
- **Cloud & Tools:** AWS (Basics – Storage & Deployment), MySQL (Basics), VS Code, Google Colab, GitHub

Experience

Python Data Science, ML & AI Intern

Luminar Technolab

Trivandrum, Kerala

Jul 2025 – Present

- Working on Python-based data science and machine learning projects under professional mentorship.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets.
- Built and evaluated supervised models including KNN, SVM, Naive Bayes, Decision Trees, and regression algorithms.
- Applied unsupervised techniques such as K-Means and Hierarchical Clustering for pattern discovery.
- Conducted feature engineering, cross-validation, and model performance optimization.
- Utilized Pandas and NumPy extensively for data manipulation and statistical analysis.

Projects

Consumer Rights Assistant – RAG-Based AI System

- Developed a Retrieval-Augmented Generation (RAG) system using Sentence Transformers, FAISS, LangChain, and a local LLM (Mistral via Ollama).
- Implemented semantic similarity search to retrieve relevant legal information from official consumer rights PDF documents.
- Designed and deployed a Streamlit-based interface to provide accurate, document-grounded responses with reduced hallucination.
- Applied prompt engineering techniques to enhance response relevance and contextual accuracy.

Real-Time Finger Counting System Using Computer Vision

- Developed a real-time finger counting application using Python, OpenCV, and MediaPipe Hands.
- Implemented hand landmark detection and finger state analysis to accurately count fingers for both hands.
- Designed logic to differentiate thumb and finger movements using landmark coordinate analysis.
- Displayed real-time finger count, hand classification (left/right), and FPS on live webcam feed.

Education

MES Institute of Technology and Management <i>Bachelor of Technology (B.Tech) in Computer Science and Engineering</i>	Chathannoor, Kollam, Kerala <i>2021 – 2025</i>
TKM Higher Secondary School <i>Senior Secondary Education (Class XII)</i>	Kollam, Kerala <i>2019 – 2021</i>
Trinity Lyceum School <i>High School Education (Class X)</i>	Kollam, Kerala <i>2019</i>

Certifications

Academy Accreditation – AI Agent Fundamentals <i>Databricks</i>
Academy Accreditation – Generative AI Fundamentals <i>Databricks</i>
